Qualcomm bets on car-to-car safety technology in India

ROAD SAFETY

- Qualcomm targets new highways, adding V2X through roadside infrastructure
- Tech operates on 5.9 GHz, facing allocation uncertainty
- Trai consultation seeks standardised V2X frameworks
- Qualcomm is diversifying beyond smartphones into automotive and industrial IoT

INDIA'S TRANSPORT AND infrastructure network gives Qualcomm an important opening to build vehicle-to-everything (V2X) safety technology directly into new roads, according to a senior company executive, as the chipmaker pushes to diversify beyond its traditional smartphone business.

"The cost of making highways capable of V2X is not very high. One can deploy the same technology in streetlight and other road infrastructure, etc. So making it available, especially for new highways that are getting deployed, is very straightforward," Nakul Duggal, Qualcomm's Group General Manager for Automotive, Industrial & Embedded IoT said in an interaction with Fe.

He added the incremental cost is low because streetlights and other roadside infrastructure can carry the same connectivity already being added to new vehicles for over-the-air software updates.

V2X relies on the 5.9 GHz spectrum band, which is under contention on whether it should be kept open to encourage broader participation or be licensed to telecom operators.

Qualcomm said that it has invested in the technology for years, betting that non-line-of-sight safety systems have an edge over cameras or radar alone. The company is pursuing three variants- vehicle-to-vehicle, vehicle-to-infrastructure and vehicle-to-smartphone, with the latter one aimed at alerting drivers to pedestrians and cyclists, mainly near intersections, which Duggal said is a major site of traffic fatalities alongside high-speed blind spots.

Meanwhile, Trai had recently released a consultation paper putting in place a framework before deployments scale with the idea of avoiding fragmented standards and ensuring systems work across vehicles, cities and networks.

Duggal said that that the rollout's pace depends on regulatory decisions, including how spectrum for the technology is allocated and whether it is treated as dedicated safety spectrum or shared, unlicensed capacity.

According to analysts, qualcomm seeks to reduce its reliance on smartphones by expanding into automotive, industrial IoT alongside physical AI. While Duggal pushed back on the idea that qualcomm's market position is eroding on the handset business, he attributed the recent softness to rising memory costs rather than lost share.

Purchase of banks' bad loans spikes 50% in Q1

IN THE JUNE quarter of FY25, ARCs had bought ₹13,852 crore of stressed assets, data from the Association of ARCs showed.

According to a source, Asset Reconstruction Company (India) {ARCIL}, was one of the most active players in the market, having acquired around ₹3,000 crore of bad loans during the June quarter. Among the private banks, RBL was seen to have sold a pool of unsecured loans during the quarter.

"Public sector banks have been mainly putting up corporate and MSME loans for sale while the private sector lenders have been displaying retail stressed assets, particularly in the unsecured book of personal loans," said the head of an ARC who did not want to be identified.

With the current series of purchases, the total dues acquired by ARCs stands at ₹1.87 lakh crore as of 30 June 2026, up from ₹1.85 lakh crore in the preceding three months.

During the quarter, ARCs issued ₹5,348 of security receipts (SRs), up from ₹4,389 a year ago. Out of this, ₹3,648 crore came from corporate accounts and ₹1,701 crore was retail assets.

In the year-ago period, corporate SRs stood lower at ₹2,685 crore while retail SRs were marginally higher at ₹1,703 crore. SRs represent the price paid by ARCs to acquire the assets.

The SR issues outstanding stood at ₹3.61 lakh crore in the June quarter compared to ₹3.56 lakh crore three months earlier.

Out of this, corporate SRs issued stood at ₹2.97 lakh crore (from ₹2.94 lakh crore) while retail was at ₹63,966 crore (from ₹62,265 crore).

Data showed that redemptions, or payback to the investors holding SRs, increased to ₹11,519 crore from ₹7,723 crore in Q1FY26 and ₹6,310 crore in Q1FY25.

The outstanding SR redemptions were at ₹2.31 lakh crore, down from ₹2.19 lakh crore three months earlier.

Iran: No direct US talks; 3rd party route on

THE IRANIAN FOREIGN Minister said some intermediary countries were still working to create the groundwork for renewed negotiations but maintained that Tehran would not return to direct talks with the US until Washington ends its violations of the 14-point memorandum of understanding signed between the two sides in June.

"Some intermediary countries are still trying to re-establish the ground for negotiations. In our opinion, there is no possibility of resuming negotiations until the US's violation of the Islamabad Memorandum of Understanding ends and the US makes up for what it has violated," the minister added.

Earlier on Saturday, Araghchi said that the deal with Oman on a legal mechanism for managing traffic through the Strait of Hormuz is 'very close', but reopening the strategic waterway will be subject to additional conditions, including compensation from the US over the latter's violations of the memorandum.

Godrej Prop to generate ₹20,000 cr operating cash flow by 2028: Chairman

GODREJ PROPERTIES WILL generate more than ₹20,000 crore of operating cash flow during the current and next fiscal, enabling the company to continue investing in business expansion, its Executive Chairperson Pirojsha Godrej said.

In an interview with PTI, Pirojsha highlighted that the company's operational performance was quite strong in the June quarter with sales bookings rising 22% to ₹8,651 crore.

He noted that consistent sales growth is creating high visibility for both cash flows and earnings."Actually, this was the sixth consecutive quarter where we had over ₹7,000 crore of sales booking values".

Pirojsha exuded confidence that the company is on track to meet or exceed guidance across all parameters -- sales bookings, launches, collections from customers and land acquisition.

The company is also on track to achieve the guidance of 20% ROE (return on equity) for the next financial year.

"In addition, we think the operating cash flow of the company, while a bit weak in Q1, is actually set to expand very rapidly. Between this quarter and Q4, FY28, so in the next seven quarters essentially, we expect operating cash flow of over ₹20,000 crore, which will create a huge amount of ability to continue to invest for growth, while also allowing us hopefully next year to be free cash flow positive," Pirojsha said.
